

Updating ONIX400 Map Software

To version: #3.0.2613.8207

It is CRUCIAL that all steps are followed as specified. Please read instructions prior to updating the Onix400 unit. If any step is not understood or is not clear, please contact Bushnell GPS Tech support for assistance. 1-800-423-3537, or email us at infogps@bushnell.com

Item you will need:

- Onix 400
- Computer
- USB Micro SD Card Adaptor
- Onix400 USB cable

Identify what Application Version you have:

(This information is in your ONIX400's SET menu, in the Unit Info screen. It is the "Application" number)

We are looking for one of the following APPLICATION #'s:

3.0.2613.8207	No update needed
2.12.2014.4486	Update needed
2.12.2027.4878	
2.13.2130.6013	
2.13.2303.5201	
3.0.2606.4198	

Instructions:

- To update the software you will need to put your files on the micro-SD card
- There are two methods to put these files on the Micro-SD card
- **Method 1:** using the Micro-SD card reader
- **Method 2:** using the USB Cable
- You can choose either method but, the files will transfer faster using the Micro-SD card (Method 1). If you do not have a reader, please use the USB cable (Method 2)

Updating ONIX400 Map Software

Method 1: Using Micro SD Card Reader Adaptor

Step 1

- Remove Battery
- Remove Micro SD Card
- Insert Card into Micro SD card reader
- Refer to **Step 1** from the files downloaded from the GPS website
- Drag and drop “**Step 1.ap**” onto the Micro-SD Card
- Safely remove Micro SD card from reader
 - To safely remove the GPS unit you will see located in the lower right hand corner of the screen a icon that when highlighted will say “**Safely Remove Hardware**” Once you click it, it will give you the option to “**Safely remove SD Device**”. You will need to select the correct drive in which you plugged in the Micro SD card reader
- Insert SD Card into Onix400
- Install the battery
- Power the GPS on
- Update will automatically begin
 - -This usually takes 1-2 minutes
- Unit will automatically power down once installation is complete

Step 2

- Remove Battery
- Remove Micro SD Card
- Insert Card into card reader
- Refer to **Step 2** from the files downloaded from the GPS website
- Drag and drop “**Step 2.ap**” onto the Micro-SD Card
- Drag and drop “**onixfs.bin**” into the *SYSTEM* folder on the Micro-SD Card
 - (This transfer may take up to 5 minutes)
- Safely remove Micro SD card from reader
- Insert Micro SD Card into Onix 400
- Install the Battery
- Power the GPS on
- Update will automatically begin
 - This usually takes 7-10 minutes
- Unit will automatically power down once installation is complete

Updating ONIX400 Map Software

Method 2: Using the Onix400 USB Cable

Step 1

- Securely plug Onix400 into USB on your Computer
- Go to “My Computer” to find this as a **Removable Drive**:
- Refer to **Step 1** from the files downloaded from the GPS website
- Drag and drop “**Step 1.ap**” onto the Onix400 Removable Disk:
- Safely remove Onix400 Removable Disk card from the computer
 - To safely remove the GPS unit you will see located in the lower right hand corner of the screen an icon that when highlighted will say “**Safely Remove Hardware**” Once you click it, it will give you the option to “**Safely remove Device**”. You will need to select the correct drive in which you plugged the Onix400 in
- Power the GPS on
- Update will automatically begin
 - -This usually takes 1-2 minutes
- Unit will automatically power down once installation is complete

Step 2

- Securely plug Onix400 into USB on your Computer
- Refer to **Step 2** from the files downloaded on GPS website
- Drag and drop “**Step 2.ap**” onto the Onix400 Removable Disk:
- Drag and drop “**onixfs.bin**” into the SYSTEM folder on the Onix400 Removable Disk:
 - (This transfer may take up to 30 minutes)
- Safely remove Onix400 Removable Disk from the computer
- Power the GPS on
- Update will automatically begin
 - -This usually takes 7-10 minutes
- Unit will automatically power down once installation is complete

Checking your Application Version:

Step 1

- After installing the Update successfully we need to make sure the update has worked.
- On the Onix400 please press the **Menu** button
- Then select the **Set** icon in the right corner
- Then scroll all the way to the bottom go to **Unit Info**
- Now we are looking for the **Application: 3.02606.4198**
- If this number is correct the update was successful, if not please contact customer care at 1-800-423-3537 or at infogps@bushnell.com
